

FUSION POS

Powerful Point of Sale System
Designed for Retailers of All Sizes

Multi-Platform POS Solution Integrated with Acumatica

FusionPOS™ is a full-featured Point of Sale solution, providing centralized management for simple or highly distributed retail environments.

FusionPOS™ is ideal for retailers wanting to fully leverage Acumatica without sacrificing any functionality available in standalone POS solutions.

What Makes FusionPOS™ different from other POS solutions?

- Eliminates Redundant Data Entry**
 Acumatica item, customer, and pricing data are automatically shared with FusionPOS™. No manual intervention required. All transactions from the POS are automatically returned to Acumatica as orders, invoices, shipments, and/or payments.
- Multi-Platform***
 FusionPOS™ can be used on Microsoft Windows PCs and laptops, as well as modern tablet devices using Microsoft Windows, iOS, and Android.
- Loyalty & Rewards**
 Available Loyalty and Rewards module which is also integrated with Acumatica. Create campaigns and coupons to make available via your own branded app your customers can download to their smart devices.
- Gift Cards**
 Available Gift Card module with centralized, hosted database and API available for your web developers to integrate your eCommerce website. Supports physical/plastic gift cards as well as electronic via your own branded app.
- Acumatica Branch Support**
 FusionPOS™ supports Acumatica branches and can create sales transactions from a given retail store for a specific branch.
- Payment Mappings**
 Payments recorded in FusionPOS™ can be mapped, per retail store and POS payment type, to specific payment methods and cash/clearing accounts in Acumatica.
- Integrated Credit Cards**
 Available integrated EMV/chip credit card processing with PIN Debit and Electronic Signature Capture.
- Serial and Lot Tracking**
 Accurately sell and record serial and lot tracked inventory.
- Multiple Customer and Register Types**
 In FusionPOS™ you can determine the nature of each customer and the degree in which that their data will migrate to your accounting system. FusionPOS™ has several register types to meet your cost and functional needs.

for Windows

FUSION POS

for iOS ANDROID

Fusion Software offers a feature rich, quick-to-learn and extremely resilient POS which is seamlessly integrated with Acumatica ERP. Its suite of applications simplify and enhance the end-user experience and extend the reach of Acumatica without affecting the core functionality.

No Down Time. Retail stores can transact business even when Internet connectivity is not available. This creates increased reliability and an enhanced customer experience.

User-Specific Interface. The FusionPOS™ use of skin technology allows clients to tailor the POS interface to meet their specific requirements.

Customer Facing Displays. Supports modern customer facing displays, which are configured as second monitors for the POS workstation. Also supports traditional pole displays.

Fusion Scheduler. The Fusion Scheduler is ideal for salons, restaurants, etc. It visually allocates resources and can be converted to a POS transaction with a single key stroke.

Fusion Enhanced Pricing. The Fusion Enhanced Pricing module provides retail-specific, non-standard pricing models beyond the scope of Acumatica, including BOGO, vendor-based specials, and more.

Order Entry. FusionPOS™ for Windows is capable of creating open orders, accepting payments to a customer account, and adding new Accounting customers to Acumatica. Default salesperson configurable per POS install or selectable “on the fly” during or prompted at the end of each transaction. The salespersons available are synced from Acumatica and recorded on the order being created.

Fusion Store Manager is the hub of retail store operations and contains three essential elements:

Fusion Store Database. All register transactions are immediately recorded on the local Fusion database.

Communication Manager. Fusion Store Manager controls all communication between the Fusion store database and the Fusion corporate database.

Reporting. Fusion Store Manager allows local reporting on store performance data. Since Fusion Store Manager contains all information needed to manage store operations, stores can conduct business even without internet connectivity.

Fusion System Manager contains the Corporate Database, the central repository for all information collected from the various Fusion store databases.

Fusion Café. Ideal for counter sale restaurants such as coffee shops, sub shops, etc. Fusion Café features a menu of configurable sale items on a series of cascading touchscreen categories. Create seasonal menus as easily swap between them. Payments are quickly and easily processed. Fusion Café is great for FusionPOS™ customers with ancillary counter-sale requirements.

A fully integrated, state of the art Point of Sale Register managed in the cloud. Updates Acumatica with accurate customer information, transaction data, revenue, costs and profits, in real time.

Seamless Real Time Integration. Directly integrated into the back office. No batching, no syncing, no end of day upload.

Increased Visibility. All transactions regardless of origin post to Acumatica in real time providing unmatched visibility into store operations.

Increased Accuracy. Inventory Items, pricing and customer specific pricing is maintained in Acumatica and verified at the register with each transaction.

Better Control. Most Register configurations are performed within Acumatica in the custom RETAIL module, including new customer defaults, warehouse defaults, register and store definitions, payment mappings, manager approval settings, and more.

Bi-directional Sales Order. Not only is FusionPOS™ capable of creating open orders in Acumatica, it allows for retrieval of open orders from Acumatica for fulfillment and payment. Also allows for retrieval of invoices to apply payments against.

Customer History. A complete customer sales history is available from the register, including invoice history which did not originate from the POS. Accounting customers may be added and edited at the POS.

User Security. Requires Acumatica user credentials at login.

Flexible Hardware Options. The AcumaticaPOS – CR offers fully integrated EMV i.e. “chip & pin” credit card processing.

Flexible Hardware Options. The software runs on modern tablet devices using IOS or Android.

Easy updates. All register updates are automatically downloaded once initiated by Management. No more late night updates
